

SECRETARY'S LETTER FOR May 27, 2021

I made an initial request to the Salt River Project to pursue the remaining water rights to the C.C. Cragin reservoir. I will continue this endeavor.

I assisted in trying to secure requested backup documentation for our failed request for a \$500,000 grant from USDA

As water resources enhancement committee chairman, I began negotiations with Margaret McKnight (a PSWID Water Sharing agreement holder) to buy her well. I made phone contact with Scott Jensen, one of a group of well owners who have conditionally offered to (give, sell?) their rights to a well outside of but near Strawberry Hollow. He indicated that two of them were not interested in selling. Due to a lack of accurate information on this well, the negotiations for this are on hold at present. Our chairman, Alan Kleinman, just notified Sharon Hillman today that they are no longer interested in selling this well.

When I receive information on the steps we need to take to buy or obtain these and other wells, I will resume negotiations.
