

PINE-STRAWBERRY WATER IMPROVEMENT DISTRICT

Board Action Item

MEETING DATE:	May 25, 2023
AGENDA ITEM:	6D
PRESENTER:	George Gorkowski
SUBJECT:	Vice Chairman's Report

Moratorium Update

We have made great progress in verifying our current and future water Demand vs Supply. Minor tweaks were made to the Moratorium model to more closely mirror actual conditions. The new numbers look promising. The board will be meeting in Executive session to discuss these new findings. We have also created a draft of how the partial lifting of the Moratorium will look and be prioritized. Please remember that the entire board will need to approve all changes before we can put together a schedule or present it to the public.

Our next action:

- Devise a monitoring system for all wells that will adjust supply data in real time.
- Finalize our release priority plan and gain board approval

The board will need to vote on the entire plan prior to any new meters being released since this would be an update to the existing moratorium.

Regards,

George Gorkowski
PSWID Vice Chairman
